                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          furin (EC 3.4.21.75) - fall armyworm
NyAlternate names: paired basic amino acid cleaving enzyme; proprotein convertase; serin
NyAlternate names: paired basic amino acid cleaving enzyme; proprotein convertase; serin
C;Species: Spedoptera frugiperda (fall armyworm)
C;Date: 11-Jan-2000 #sequence_revision 11-Jan-2000 #text_change 09-Jul-2004
C;Accession: T43251
R;Cieplik, M;Klenk, H.
submitted to the EMBL Data Library, January 1996
A;Description: Cloning and functional characterization of FURIN from Spodoptera frugiper
A;Reference number: Z22368
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    A; Residues: 1-1299 <CLE>

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         ò
A; Experimental source: S6S6 homozygote kale
C; Genetics:
A; Gene: SRK
A; Note: SRK
A; Note: SRK
A; Note: SRK
A; Note: Iocus is highly polymorphic
C; Function:
A; Description: involved in preventing fertilization between plants having the same S-loc
C; Superfamily: S-receptor kinase; protein kinase homology; S-locus-specific glycoprotein
C; Keywords: ATP; glycoprotein; magnesium; phosphotransferase; receptor; serine/threonine
F; 1-30/Domain: signal sequence #status predicted <SIG>F; 31-857/Product: S-receptor kinase #status predicted <NAT>F; 447-466/Domain: transmembrane #status predicted <TWM>F; 524-813/Domain: protein kinase homology <KIN>F; 524-813/Domain: protein kinase ATP-binding motif
F; 534-542/Region: protein kinase ATP-binding motif
F; 571-120, 196, 260, 314, 389, 442/Binding site: carbohydrate (Asn) (covalent) #status predict
F; 558, 652/Binding site: magnesium (Asn, Asp) #status predicted
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      A;Cross-references: UNIPROT:P41771; EMBL:U04714; NID:g436876; PIDN:AAA21530.1; PID:g4368 A;Note: the source is designated as Kluyveromyces lactis C;Genetics: A;Gene: ERD1

hypothetical protein F2401.2 - Arabidopsis thaliana
C;Species: Arabidopsis thaliana (mouse-ear cress)
C;Species: Arabidopsis thaliana (mouse-ear cress)
C;Acression: T01440
R;Shinn, P.; Buehler, E.; Dewar, K.; Feng, J.; Kim, C.; Li, Y.; Sun, H.; Conway, A.; Conway, A.; Eker, J.R.
submitted to the EMBL Data Library, January 1998
A;Description: Genomic sequence for Arabidopsis thaliana BAC F2401.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            A;Residues: 1-906 <SHI>

C; Keywords: glycoprotein
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        554174

DNA topoisomerase (BC 5.99.1.2) - malaria parasite (Plasmodium falciparum)

C;Species 1 lasmodium falciparum

C;Date: 08-Uul-1995 #sequence_revision 21-Jul-1995 #text_change 09-Jul-2004

C;Accession: S54174

R;Tosh, K.T.; Kilbey, B.J.K.

Submittion: Loolation and characterisation of the topoimerase 1 gene from Plasmodium A;Reference number: S54174

A;Accession: S54174

A;Accession: S54174

A;Referus: preliminary

A;Molecule type: DNA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    A)Residues: 1-490 < DAN>

"B call maturation protein is a receptor for the tumor necrosis factor family member TALL-1.";

Proc. Natl. Acad. Sci. U.S.A. 97:9156-9161(2000).

-I- FUNCTION: Receptor for TNFSP13B/BLyS/BAFF and TNFSP13/APRIL.

Promotes B-cell survival and plays a role in the regulation of humoral immunity. Activates NF-kappa-B and JNK.

-I- SUBUNIT: Associates with TRAPI, TRAF2, TRAF3, TRAF5 and TRAF6.

-I- SUBCELULIAR LOCATION: Type III membrane protein. Plasma membrane and perinuclear Golgi-like structures.

-I- TISSUB SPECIFICITY: Expressed in mature B-cells, but not in T-
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       cells or monocytes.
